

NEAR INFRARED
REFLECTIVE

FENC[®]  Solarfree^{RED}

UV Cut &
Heat Protective

Skin Protection & Heating Prevention 隔熱紗

產品簡介 戶外運動時，熱來源之一是來自太陽光中的近紅外線(約佔太陽光的50%)照射，隔熱纖維能有效反射近紅外線，可有效保護皮膚及隔絕熱源，避免皮膚受到傷害。

One of the sources of heat from outdoors is near infrared (50% of sunlight). Solarfree^{RED} can reflect nIR which shields the skin from irradiative heat, so as to maintain cooler temperatures even under direct sunlight, while also protecting against accelerated dermal aging caused by both nIR and UV.

產品特色

- 反射近紅外線 Reflects nIR radiation
- 優異抗紫外線 UV-Cut
- 減緩溫度上升 Heat protection
